CITY OF Grand Junction COLORADO

GRAND JUNCTION CITY COUNCIL
MONDAY, JULY 13, 2020

PRE-MEETING (DINNER) 5:00 PM
WORKSHOP, 5:30 PM
CITY HALL AUDITORIUM
250 N. 5TH STREET

To become the most livable community west of the Rockies by 2025

1. Discussion Topics

a. Parks, Recreation, and Open Space Master Plan Council Workshop

b. Tobacco & Vaping Discussion

c. Marijuana Discussion

2. City Council Communication

An unstructured time for Councilmembers to discuss current matters, share ideas for possible future consideration by Council, and provide information from board & commission participation.

3. Next Workshop Topics

4. Other Business

What is the purpose of a Workshop?

The purpose of the Workshop is to facilitate City Council discussion through analyzing information, studying issues, and clarifying problems. The less formal setting of the Workshop promotes conversation regarding items and topics that may be considered at a future City Council meeting.

How can I provide my input about a topic on tonight's Workshop agenda?
Individuals wishing to provide input about Workshop topics can:

1. Send an email (addresses found here www.gjcity.org/city-government/) or call one or more members of City Council (970-244-1504);

2. Provide information to the City Manager (citymanager@gjcity.org) for dissemination to the City Council. If your information is submitted prior to 3 p.m. on the date of the Workshop, copies will be provided to Council that evening. Information provided after 3 p.m. will be disseminated the next business day.

3. Attend a Regular Council Meeting (generally held the 1st and 3rd Wednesdays of each month at 6 p.m. at City Hall) and provide comments during "Citizen Comments."

Information

SUBJECT:

Parks, Recreation, and Open Space Master Plan Council Workshop

EXECUTIVE SUMMARY:

The purpose of this workshop to engage with City Council as the planning process gets underway for the Parks, Recreation and Open Space (PROS) Master Plan.

BACKGROUND OR DETAILED INFORMATION:

The City, working with a consulting group, is forging a parks, recreation and open space master plan derived from public engagement and input. The central purpose of this effort is to produce a Parks, Recreation and Open Space (PROS) Master Plan. The Master Plan will provide clear direction for services, facilities and amenities for the next 5 to 8 years. This is an action step in the draft Comprehensive Plan. The PROS Master Plan will dovetail and build off of the Comprehensive Plan.

This workshop will kick off a series of public meetings that will include engaging with the Council appointed PROS Advisory Committee, the Parks and Recreation Advisory Board, several focus groups within certain areas (Forestry Board, Parks Improvement Advisory Board, Arts Commission, Open Space Leaders/Partners, Public Partners including CMU, the County and School District 51, business leaders, sports user groups, inclusion leaders, health care and staff) as well as public forums.

Included in the Council Packet is the binder provided to the Advisory Committee. This provides background on past planning efforts as well as information regarding the current Parks, Recreation and Open Space system.

FISCAL IMPACT:

N/A

SUGGESTED ACTION:

For City Council discussion.

Tobacco & Vaping Discussion

EXECUTIVE SUMMARY:

Council first discussed this topic during a workshop held on June 29. Council requested more information on this topic. To aid in the discussion, staff arranged for a presentation from a representative of Tobacco Free Kids on tobacco use. According to Tobacco Free Kids, the annual health care costs in Colorado directly caused by smoking is $1.89 billion and Medicaid costs caused by smoking in Colorado is $386.3 million. These amounts do not include health costs caused by exposure to secondhand smoke, smoking-caused fires, smokeless tobacco use, or cigar and pipe smoking. Tobacco use also imposes additional costs such as workplace productivity losses and damage to property.

When discussing tobacco and vaping there are various considerations including taxing, ordinances, etc. With scarce resources, it is important to explore new avenues in finding solutions to funding challenges, furthermore with the crisis caused by the COVID-19 pandemic, the City's traditional revenue sources will likely be stressed for the foreseeable future. In order to meet funding challenges, the sale of items to which sales tax applies/is currently collected could be expanded. Recent conversations have highlighted the opportunity to explore taxing the sales of tobacco and vaping products.

BACKGROUND OR DETAILED INFORMATION:

Council first discussed this topic during a workshop held on June 29. Council requested more information on this topic. To aid in the discussion, staff arranged for a

presentation from a representative of Tobacco Free Kids on tobacco use.

Tobacco Free Kids - According to Tobacco Free Kids, published research studies have found that kids are twice as sensitive to tobacco advertising as adults and are more likely to be influenced to smoke by cigarette marketing than by peer pressure. One-third of underage experimentation with smoking is attributable to tobacco company advertising. The annual health care costs in Colorado directly caused by smoking is $1.89 billion and Medicaid costs caused by smoking in Colorado is $386.3 million. These amounts do not include health costs caused by exposure to secondhand smoke, smoking-caused fires, smokeless tobacco use, or cigar and pipe smoking. Tobacco use also imposes additional costs such as workplace productivity losses and damage to property. Also according to Tobacco Free Kids, smoking kills more people than alcohol, AIDS, car crashes, illegal drugs, murders, and suicides combined in Colorado — and thousands more die from other tobacco-related causes — such as fires caused by smoking (more than 1,000 deaths/year nationwide) and smokeless tobacco use.

Healthy Kids Colorado Survey - The purpose of the Healthy Kids Colorado Survey is to better understand youth health and what factors support youth to make healthy choices. The survey, conducted every two years, is supported by the Colorado Department of Public Health and Environment, the Colorado Department of Education and the Colorado Department of Human Services. The University of Colorado Anschutz Medical Campus administers the survey. Attached is the most recent survey results which provides insights on tobacco use among school age children.

Tax on Tobacco and Vaping Products - Voters in municipalities across the State of Colorado have approved taxes on tobacco and vaping products. The City of Boulder has a 40% tax on vape products. A 40% tax on other tobacco products, including electronic cigarettes, passed in Crested Butte, Glenwood Springs, New Castle, Vail, and Eagle, Summit, and Pitkin counties. Local taxes on cigarettes range between $3 and $4 per pack. Revenue generated from the tax in the Town of New Castle during the months of January and February of this year were trending in a direction that would surpass the $65,000 threshold voters approved last year. At this rate, the town would collect approximately $390,000 over the course of a year. Summit County estimates that the tobacco tax will generate $3.8 million in revenue in its first year. Similarly, the City of Boulder and City of Glenwood Springs estimated revenues from the tobacco tax to be $2.5 million and $650,000 in their respective 2020 budgets.

Using the projections provided by these cities as a model, the City of Grand Junction could increase revenues by approximately $800,000 to $1 million.

As a reminder, any new taxes will require an amendment to the tax code and existing ordinances. To accomplish such, a vote will be necessary. Should Council consider

referring a ballot question to the voters this fall, the proposed timeline is as follows:

- July 26 – Deadline to notify the County Clerk of the intent to participate in a coordinated election.
- September 4 – Deadline for the City to certify ballot content to Mesa County.
- September 18 – Written comments concerning TABOR issues must be filed with State
- September 21 – Deadline to deliver TABOR notice to Mesa County
- November 3 – Election Day

An Election Calendar is attached.

With the passage of HB 20-1427 a statewide ballot issue will be referred to the November election for incremental tax changes beginning January 1, 2021. Those changes include tax increases on nicotine containing products.

CITY OF Grand Junction COLORADO

CITY MANAGER'S OFFICE

Memorandum

TO: Mayor and Members of Council

FROM: Greg Caton, City Manager

Jodi Romero, Finance Director

DATE: May 11, 2020

SUBJECT: Revenue Options

A core responsibility of the City of Grand Junction is to be a responsible steward of our finances. Staff is regularly asked about revenue options, so we annually share revenue for Council's information. Historically, the community's growing expectation to provide additional services has not been met with a proportional increase in a willingness to increase funding. With scarce resources, it is important to be creative in finding solutions to funding challenges. Recent community conversations have highlighted the opportunity to explore tax options for the sales of tobacco and vaping products as well as taxing the sale of marijuana products. Marijuana is complex topic and will be discussed in a separate memo in the coming weeks. The following memo explores some standard revenue and new source options. The City's primary revenue source, sales tax, will be stressed for the foreseeable future. So, City Council may want to consider new sources to replace the shortfall from historic sources.

Increase & Expand Sales Tax – Sales tax is a major and primary source of revenue for cities. Sales taxes are currently collected on only a certain number of items at a rate of 3.25%. For example, the City of Grand Junction does not tax food for home consumption or residential utilities. The rate could be increased as the City's current sales tax rate is lower than the average of other cities in Colorado. The types of items from which sales tax is currently collected could be expanded as well. With the crisis causes by the COVID-19 pandemic, our traditional revenue sources will likely be stressed for the foreseeable future, therefore, we wanted to put forward the following suggestions for discussion of new sources of revenue:

Sales Tax on Tobacco & Vaping Products – Taxes on tobacco and vaping products is universally used by state governments in the US. The rationale behind these taxes is typically to reduce the demand for tobacco products due to associated health risks, and to generate tax revenue for tobacco secession, tobacco related health services and education.

Voters in municipalities across the state have approved taxes on tobacco and vaping products. The city of Boulder has a 40% tax on vape products. A 40% tax on other tobacco products, including electronic cigarettes, passed in Crested Butte, Glenwood Springs, New Castle, Vail, and Eagle, Summit, and Pitkin counties. Local taxes on cigarettes will range between $3 and $4 per pack.

Revenue generated from the tax in the Town of New Castle during the months of January and February of this year were trending in a direction that, if allowed to continue, would surpass the $65,000 threshold voters approved last year. At this rate, the town would collect approximately $390,000 over the course of a year. The town does not have to adhere to the cap in years following 2020. Summit County estimates that the tobacco tax will generate $3.8 million in revenue in its first year. Similarly, the City of Boulder and City of Glenwood Springs estimated revenues from the tobacco tax to be $2.5 million and $650,000 in their respective 2020 budgets.

Using the projections provided by these cities as a model, the City of Grand Junction could increase revenues by approximately $800,000 to $1 million.

Sales Tax on Grocery Items – In Colorado, certain grocery items are exempt from state sales tax, though municipalities can tax these items. The City of Fort Collins, for example, has a 2.25% tax on food for home consumption. The City of Aspen does not exempt food from sales tax, but refunds a fixed amount per person that lived in the city for the entire preceding year. By doing so, Aspen is able to collect sales tax on food purchased by visitors, while minimizing the impact on residents through a refund. It is estimated that $265 million in tax exempt food for home consumption is sold in Grand Junction annually.

Sales Tax on Services – Sales tax collections could also be expanded to include services not currently taxed. Increasing revenues from services would help capture consumer dollars spent on discretionary items and would ensure that consumer spending is taxed broadly and evenly. Examples of services that are not currently taxed locally are a variety of personal services, business services, computer services, admissions and amusements, and professional services. Like collecting tax on internet sales, the standards for this would likely have to come from the Federal or State level.

Mill Levy Adjustments & Property Tax – A mill levy adjustment would allow the City to maintain revenue in response to changes in property tax from the 1982 Gallagher Amendment, which maintains Colorado's base property tax ratio at 55% for commercial property and 45% for residential. It is important to remember that under this law, commercial property is assessed at a fixed 29% rate, requiring that the residential assessment rate be lowered periodically in order to balance. Grand Junction currently enjoys low mill levy rates relative to other parts of the state. Adjusting mill levies would allow the City to also maintain revenue despite changes in valuation across the state. Alternatively, rural fire districts could adjust their respective mill levies to keep their revenues from decreasing.

The Colorado State Legislature is considering a resolution to repeal the Gallagher Amendment to the State Constitution. If approved, it would refer a question to the voters in November to freeze the residential assessment rate at 7.15%.

Property Tax – Property tax is based on the value of real estate and personal property that a person owns within a jurisdiction and is calculated by multiplying the value of the property by the assessment rate and mill levy. Increasing the City's property tax would increase revenues, however with the current rate of just 8 mills in the City of Grand Junction, property tax would have to be significantly increased to match the potential revenues of increasing other sources, such as sales tax. For example, current property tax revenues in the City are approximately $7.5 million from our 8 mills. If an increase in sales tax by 0.25% generates roughly $4.5 million in additional revenue, generating a similar amount of new revenue from property tax would require the mill levy to increase by an additional 4.8 mills. Furthermore, the sales tax base is much larger than the base for property tax. Using the same example, approximately $4.5 million would be generated by a sales tax increase of 0.25%, compared to 60% increase in the property tax mill rate.

CITY OF Grand Junction COLORADO

CITY MANAGER'S OFFICE

Memorandum

TO: Mayor and Members of Council

FROM: Greg Caton, City Manager

DATE: May 28, 2020

SUBJECT: Fall Election & Potential Ballot Questions

The crisis caused by the COVID-19 pandemic has had an impact on our local economy. The *Stay at Home* Order from the Governor and mandatory business closures occurred in mid-March and significantly impacted many businesses and corresponding retail activity. Since sales tax is a major and primary source of revenue for cities, the impacts to retail activity affect our ability to fund core municipal services.

The City's revenues are also constrained by the ratchet-down effect of the Taxpayers Bill of Rights (TABOR). TABOR restricts general revenues to the prior year's revenues adjusted for population growth and inflation. Any excess revenues must be rebated back to the population through tax reductions or cash rebates. Voter approval is needed to override any of these provisions and some provisions cannot be exempted.

2020 revenues are projected to be 25% lower than budgeted. With these projected losses in revenues, we suggest that City Council refers two questions to the voters during the November election. These questions are for an increase in sales tax on tobacco and vaping products and to de-*Bruce* the City from restrictions brought by TABOR. This purpose of this memo is to describe the current state of the City's revenues and offer suggestions for expanding into new areas of sales tax collections as well as de-*Brucing*.

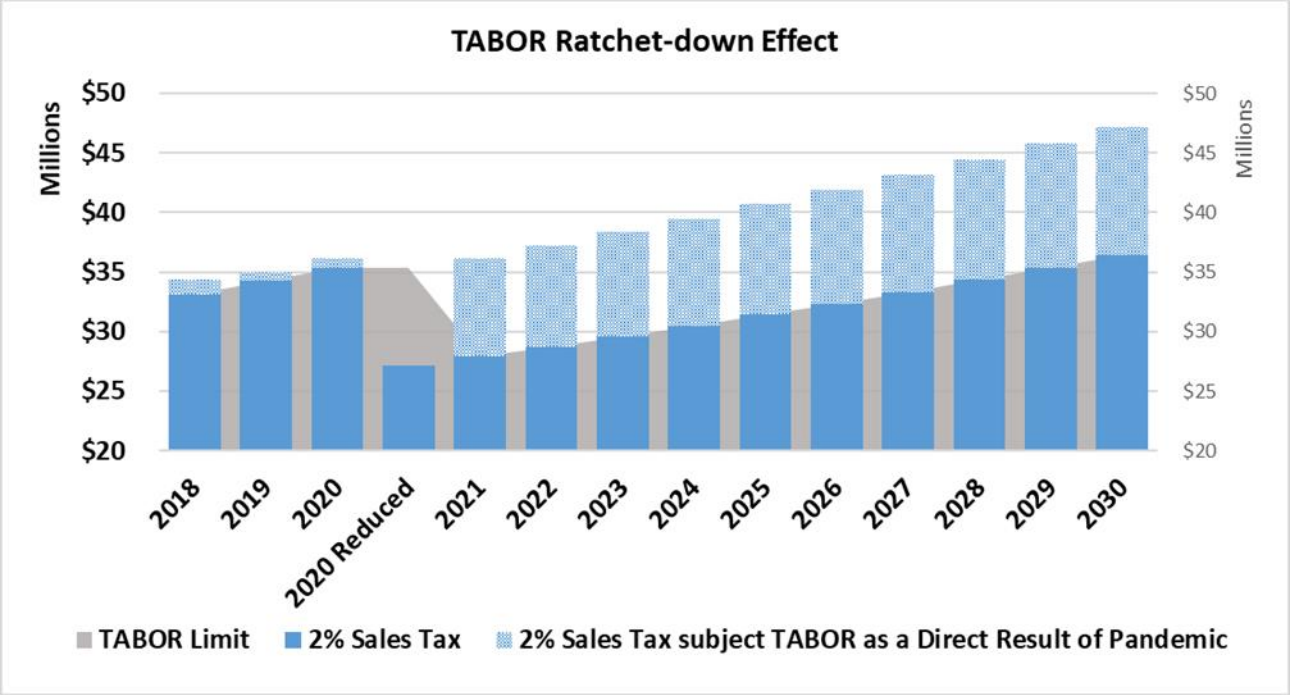
TABOR Restrictions – The following describes the current restrictions placed on revenues by TABOR:

Ratchet-down Effect of TABOR – The formula to calculate the TABOR surplus is based on the previous year's actual revenues or the revenue allowed under TABOR restrictions (TABOR Limit), whichever is lower. This reduction could result in a greater amount of 2021 and future revenues being subject to the TABOR surplus calculation. The *whichever is lower* requirement in the TABOR amendment is what causes the ratchet-down effect.

The City's 2% sales tax revenues in 2019 totaled approximately $35 million, and of that the TABOR Limit was $34.3 million. Because the TABOR Limit from 2019 is less than the actual revenues, that is used as the base and then is increased by an estimated allowed growth rate of 3.2% for a TABOR Limit of $35.4 million in 2020. When developing the 2020 Annual Budget, staff projected revenues to be approximately $36.2 million, however due to the economic impact from the COVID-19 pandemic crisis, the revenues have been reduced by 25%. Assuming that revenues return to a pre-pandemic level in 2021 with no growth, the amount of revenue now subject to TABOR will increase significantly.

Although there is no new growth in 2021, the amount subject to surplus actually increases. As shown in the chart below, the effect of the *ratchet-down* means that the 2021 TABOR limit will be significantly less than the limit would have been if revenues had not been affected by the

pandemic. As a reminder, the City is currently allowed to use its TABOR surplus for road and transportation projects. While the City will be able to use the new amount of surplus on transportation projects, the *ratchet-down* effect will reduce the amount of funds available for other operations, such as police and fire. This effectively reduces the amount of funding available for other core municipal services.



Options for Next Steps – The ratchet-down effect could disproportionately affect our expenditures and ability to provide core municipal services. Without the ability to use the greater amount of surplus for things other than road and transportation projects, there exists a scenario where some services would not have enough funding when other services have an increased amount available.

There is, however, a method for reducing the restrictions brought by TABOR. When local governments are allowed to permanently keep revenues in excess of TABOR's specified limit in lieu of returning it to the citizens, it is known as d*e-Brucing*. This is compared to the City's current authorization, where voters have temporarily allowed the City of Grand Junction to use the TABOR surplus for certain uses. By de-*Brucing* the entirety of the City's TABOR surplus, there would be no restrictions on how the City could spend the funds. This means that core municipal services would not be at risk of reduced revenues.

There are revenue collection scenarios that may not trigger as significant of an amount of additional TABOR surplus. For example, if the revenue growth does not return to pre-pandemic levels in 2021 and is slow and it falls within the allowed revenue growth limits, then the ratchet-down would not be as severe. However, it is more likely for the ratchet-down to have the impact demonstrated, and if we wait to see if this materialized, we would likely be in a reactionary position. Although we do not know the full impact of the potential ratchet-down effect on the City, we recommend City Council consider a ballot question to prevent this situation from occurring.

Sales Tax on Tobacco & Vaping Products – Taxes on tobacco and vaping products is universally used by state governments in the US. Voters in municipalities across Colorado have also approved taxes on tobacco and vaping products. For example, a 40% tax on other tobacco products, including electronic cigarettes, passed in Crested Butte, Glenwood Springs, New Castle, Vail, and Eagle, Summit, and Pitkin counties. Local taxes on cigarettes range between $3 and $4 per pack and the chart below shows the rates for tobacco and vape taxes in the state:

Entity	**Tax**
State of Colorado	- $0.84 per pack of cigarettes - No vapor tax
Summit County	- $4.00 per pack of cigarettes - 40% increase in sales tax for nicotine and tobacco products that will increase annually for four years through 2024.
Town of Carbondale	- $4.00 per pack of cigarettes - 40% tax on all other nicotine products
Pitkin County	- $3.20 per pack of cigarettes with a $0.10 increase until the tax reaches $4.00 - 40% tax on other tobacco and nicotine products
Eagle County	- $4.00 per pack of cigarettes - 40% tax on tobacco and nicotine products other than cigarettes
City of Glenwood Springs	- $4.00 per pack of cigarettes - 40% tax on all other tobacco products - Prohibits the sale of flavored tobacco products
Town of New Castle	- $3.20 per pack of cigarettes with a $0.10 increase until the tax reaches $4.00 per pack - 40% tax on tobacco and nicotine products
Town of Vail	- $3.00 per pack of cigarettes - 40% tax on tobacco and nicotine products
City of Aspen	- $3.00 per pack of cigarettes - 40% tax on other tobacco or nicotine products
Town of Avon	- $3.00 per pack of cigarettes - 40% tax on other tobacco or nicotine products
Town of Crested Butte	- $3.00 per pack of cigarettes - 40% tax on other tobacco or nicotine products

Revenue generated from the tax in the Town of New Castle during the months of January and February of this year were trending in a direction that, if allowed to continue, would surpass the $65,000 threshold voters approved last year. At this rate, the town would collect approximately $390,000 over the course of a year. The town does not have to adhere to the cap in years following 2020. Summit County estimates that the tobacco tax will generate $3.8 million in revenue in its first year. Similarly, the City of Boulder and City of Glenwood Springs estimated revenues from the tobacco tax to be $2.5 million and $650,000 in their respective 2020 budgets. Using the projections provided by these cities as a model, the City of Grand Junction could increase revenues by approximately $800,000 to $1 million.

Election Schedule & Timeline – Attached is the full election calendar for the November election. Election Day is November 3.

Should Council consider referring a ballot question to the voters, the proposed timeline is as follows:

- July 26 – Deadline to notify the County Clerk of the intent to participate in a coordinated election.
- September 4 – Deadline for the City to certify ballot content to Mesa County.
- September 18 – Written comments concerning TABOR issues must be filed with State
- September 21 – Deadline to deliver TABOR notice to Mesa County
- November 3 – Election Day

We suggest that City Council consider two questions this fall. The first question would entail de-*Brucing* in order to prevent the *ratchet-down* effect from negatively impacting our ability to fund core city services. The second question could entail a new sales tax on tobacco and vaping products, which could generate approximately $800,000 - $1 million in new revenue, depending on the rate and volume of sales.

I look forward to receiving your feedback.

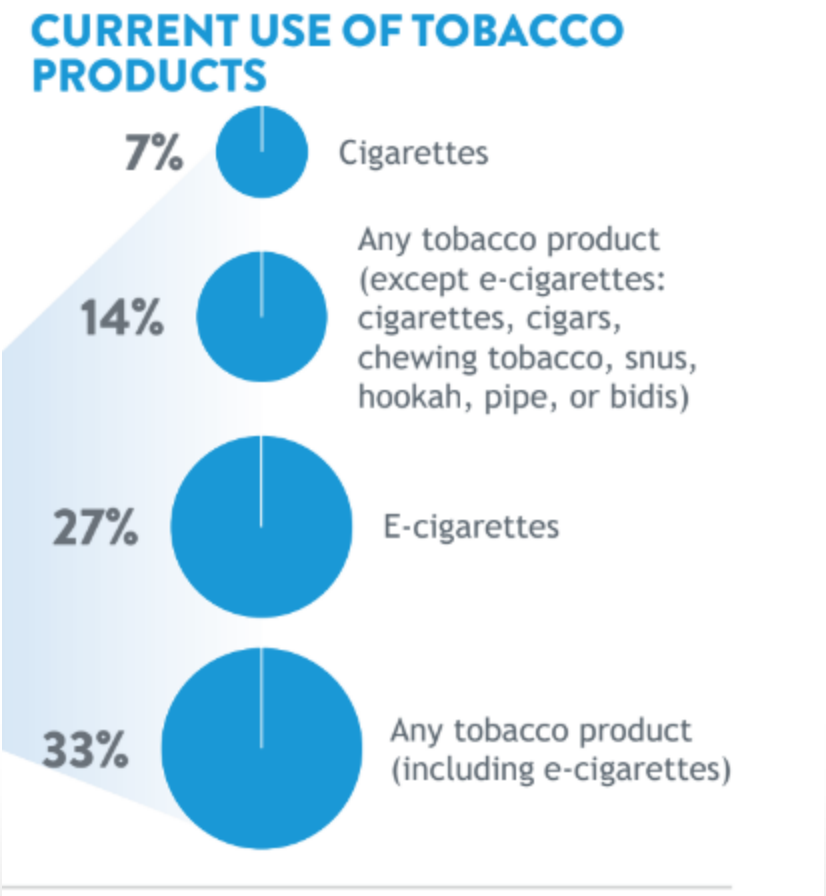
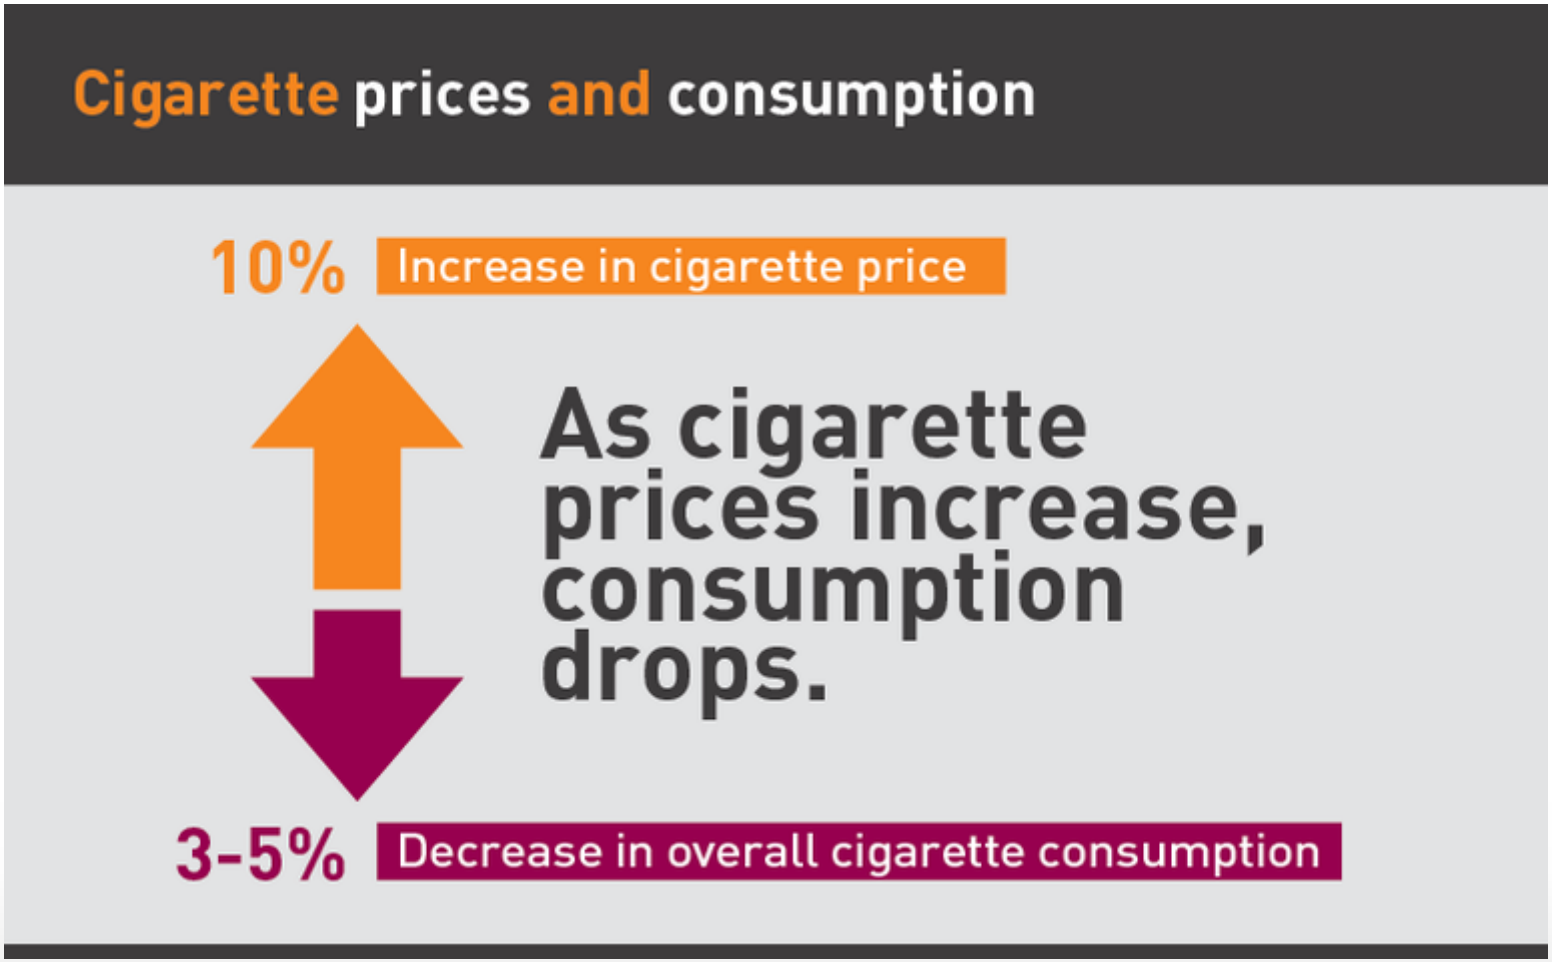
Youth + Kids Use = not ONLY a Vaping Problem, but a Tobacco Problem



This is a tobacco problem.

33%, or, one third of Colorado kids use tobacco.

Benefits of Tobacco Tax Increases



***Youth & Pregnant Women = 7% reduction in use**

Cost of Tobacco Use

***Colorado - $1.89 billion annual healthcare costs**
Medicaid - $386.3 million

HB 1033 Authority

<u>City</u>:
Removed language that forfeited state revenues IF cigarettes are included in Tobacco Retail Licensure Requirements, a fee is assessed on cigarettes or if a city ATTEMPTS to raise the tax on cigarettes.

NOTE: IF a city successfully passes a tobacco tax that includes cigarettes, they STILL forfeit the shareback revenues.

<u>County:</u>
Expanded authority to counties, including the addition of raising the minimum age of sale.

IF a municipality within the boundary of a county already has imposed a tax on tobacco, they are excluded from the taxation at the county level UNLESS an IGA is formed (which may include a provision for distribution).

Pre-HB 1033

November 2017

Aspen - $3.00/pack, 40% OTP tax increase, includes ecigs + a 10-cent inflator annually until the tax reaches $4.00

April 2018

Basalt - $2.00/pack, 40% OTP tax increase, includes ecigs

November 2018

Avon - $3.00/pack, 40% OTP tax increase, includes ecigs

Carbondale - $4/pack, 40% OTP tax, including ecigs

Tobacco Taxes – Parity

Importance of Parity & Price Equivalency

*Avoid dual use of products, and tax evasion. Goal for public health and consumer is to successfully quit use of tobacco.

Proposed Cigarette Increase	OTP Parity Rate	E-Cigarette & Vaping Products
$2.00	21%	**61%**
$3.00	43%	83%
$4.00	64%	104%

Common Myths & Questions

Regressivity

State Ballot Issue for November 2020 –
Why do this at the Local Level?

Tobacco taxes don't actually reduce tobacco use. Kids will continue to use and find a way to get cigarettes (vaping products, et al), anyway.

Amount of increase?

Other Questions?

Projections (Estimates) – Key Point, Estimate HIGHER than expected to avoid TABOR return

Here are the following data inputs needed:

- Annual local cigarette pack sales (you can back-calculate this with the state pack sales and the percentage from the cigarette rebates)
- Cigarette pack price
- Sales tax rate (if it is included in the cigarette pack price)
- Proposed tax increase you decide on

You will need to calculate the percentage increase in pack price after the tax increase, and then apply the elasticity to that percentage increase in price to determine the decline in pack sales.

Factors to consider: **price increase yields decrease in consumption, quit attempts, small level of price evasion (online, reservation sales, some crossborder purchasing, both in-state and out-of-state depending on proximity).**

SUBJECT:

Marijuana Discussion

EXECUTIVE SUMMARY:

Marijuana sales in Colorado started following the passage of Colorado Amendment 64, an initiative ballot measure to amend the Constitution of the State of Colorado, outlining a statewide drug policy for cannabis, in 2012.

A common definition of marijuana is supplied in Article XVIII, Section 16 of the Colorado Constitution, which also establishes marijuana regulations effective statewide. The article defines marijuana as “all parts of the plant of the genus cannabis whether growing or not, the seeds thereof, the resin extracted from any part of the plant, and every compound, manufacture, salt, derivative, mixture, or preparation of the plant, its seeds, or its resin, including concentrate.” While both marijuana and industrial hemp are derived from the plant Cannabis sativa L., marijuana is distinguished from industrial hemp in that marijuana contains higher concentrations of delta-9 tetrahydrocannabinol (THC). The used portion of the Cannabis sativa plant also differs between marijuana and hemp. Marijuana is typically the flower-bud and hemp typically encompass stems and seeds.

There are three primary elements of the marijuana industry: growing; processing; and retail sale. There is also an emerging fourth element: public consumption. All are regulated at a state-level, but the state also enables local jurisdictions to promulgate their own regulations.

This item is intended for discussion and possible direction by Council. As a part of the

discussion, a representative from the Marijuana Enforcement Division (MED) will present on the topic.

BACKGROUND OR DETAILED INFORMATION:

A common definition of marijuana is supplied in Article XVIII, Section 16 of the Colorado Constitution, which also establishes marijuana regulations effective statewide. The article defines marijuana as "all parts of the plant of the genus cannabis whether growing or not, the seeds thereof, the resin extracted from any part of the plant, and every compound, manufacture, salt, derivative, mixture, or preparation of the plant, its seeds, or its resin, including concentrate." While both marijuana and industrial hemp are derived from the plant Cannabis sativa L., marijuana is distinguished from industrial hemp in that marijuana contains higher concentrations of delta-9 tetrahydrocannabinol (THC). The used portion of the Cannabis sativa plant also differs between marijuana and hemp. Marijuana is typically the flower-bud and hemp typically encompass stems and seeds.

State laws distinguish between marijuana for recreational (or "retail") and medical (or "medicinal") uses. Please note that Medical Marijuana is regulated separately under Article XVIII, Section 14 of the Colorado Constitution. Actual marijuana products, as well as the processes involved in growth, processing, and sale of same, are essentially the same for medical and recreational marijuana. Many Colorado counties and municipalities established separate ordinances for the regulation of medical marijuana prior to legalization of recreational marijuana in the state. Some jurisdictions do allow medical marijuana related businesses but do not allow recreational marijuana businesses. Other jurisdictions regulate recreational and medical marijuana with minimal differences in zoning and permitting.

Elements of Marijuana-related Business – There are three primary elements of the marijuana industry: growing; processing; and retail sale. There is also an emerging fourth element: public consumption. All are regulated at a state-level, but the state also enables local jurisdictions to promulgate their own regulations. The state of Colorado through their Department of Revenue performs "seed-to-sale" tracking of all marijuana produced for retail sale in the state using a system called METRC. METRC requires that all marijuana be assigned and accompanied by a tracking tag called an RFID at all stages in the process. No marijuana grown outside the state can be sold in the state.

Growing – State laws distinguish medical grows from recreational grows, though the actual growing processes are generally identical. Marijuana can be grown with natural light outdoors, with artificial light indoors, or with both kinds of light in a "mixed-light" grow. Such grows, when related to processing and retail, are typically large-scale. These large, intensive grows may have a significant draw on electrical, water, and other utility services, and in some parts of the state may have as many as 15,000 plants indoors or involve dozens of outdoor acres. The state enables jurisdictions to

regulate marijuana grows for retail purposes. These require a Retail Marijuana Cultivation License from the state, and typically also require a Local License issued by the local jurisdiction.

However, per the Colorado Constitution and indifferent of local regulations, an individual over age 21 can grow up to six plants, up to twelve per residence, with restrictions on public visibility and accessibility by children. These homegrown products cannot be sold on the retail market. A primary distinction between the medical and recreational marijuana industries is the “Caregiver” function. A medical marijuana patient can designate another resident as a Caregiver; the Caregiver may then be allowed to grow an additional six plants allotted to that patient. A caregiver may grow plants for up to five patients plus themselves, for a total of 36 plants; a waiver extending the plant count may be granted by a medical professional, but this happens rarely. Occasionally, groups of Caregivers have created cooperatives to combine their plant totals at a single growing location. For several years this resulted in hundreds of plants to be grown at a site without regulation by the local jurisdiction, but a 2017 law limited the right of per-person medical and recreational marijuana grows to be combined in a single location. Jurisdictions cannot infringe upon the aforementioned home-grow and Caregiver rights, and for this reason the City has approved site plans and change of use applications related to medical marijuana grow operations in the City.

Processing – Marijuana is typically processed before consumption into a variety of forms. Processing of raw plant material into marijuana for consumption as smoke or vapor can be limited to the trimming and curing of marijuana flower-buds, which is generally allowed at cultivation facilities. In land use regulations, “processing” typically refers to more intensive procedures used to make oils, waxes, products intended for consumption as food and drink (marijuana “edibles”), tablets, sprays, liquid extracts, or topical creams. All such processing facilities require licensing at the state level and can be regulated by local jurisdictions.

Certain marijuana-related land uses can be subsumed under the processing category but are also regulated separately by certain communities. Examples include marijuana research and development facilities and marijuana testing facilities. Testing facilities may be a particularly important concern for Grand Junction, where the hemp industry has already indicated the need for a State-approved testing facility on the Western Slope.

Retail Sales – After processing, marijuana is sold directly to consumers in specialized retail locations, rather than as a product in a general retail store. These locations are usually recognizable as a store or shop, often called a “dispensary” whether medical or recreational in nature. Retail sales of marijuana also require state licensing and require further licensing requirements in most municipalities. These premises have security

and surveillance requirements under state law. Products are subject to safe handling requirements and all sales are managed by an employee who may only transact in a form that meets “closed container” requirement, akin to requirements for alcohol sales.

Consumption – A fourth, emerging dimension of the marijuana industry encompasses sites for public consumption. Generally, marijuana must be consumed on private property and without generation of nuisance; however, as of January 1, 2020, Colorado has legalized businesses that facilitate consumption in some public places, in and out of doors. Specifically, “marijuana hospitality establishments” have been introduced to counteract problems with public consumption by tourists. Licensed establishments for public consumption of marijuana are generally equivalent to bars where alcohol is consumed. These may be allowed for sections of hotels, and under state law these may even include “mobile premises” such as tour buses. These uses can be regulated by local jurisdictions.

Marijuana Regulations in Colorado Communities – Other communities in Colorado have already adopted marijuana regulations. These communities exhibit a range of regulatory approaches, with some regulating only one or some of the elements of marijuana-related businesses. Examples include:

• The Town of Palisade conditionally permits recreational and medical marijuana sales in a range of zone districts, and conditionally allows cultivation and processing in the same zones as well as in their more agricultural zone districts. By contrast, the City of Fruita and Mesa County passed Ordinances similar to the one passed by the City of Grand Junction, prohibiting all uses related to recreational marijuana as well as the sale of medical marijuana.
• The City of Glenwood Springs conditionally allows cultivation and sale in a range of mixed-use, commercial, and industrial zone districts with a special use permit.
• The City of Delta conditionally allows a full range of medical marijuana land uses but does not allow any recreational marijuana land uses.
• The City of Montrose does not allow any medical marijuana or recreational marijuana land uses except for those rights to personal cultivation and consumption protected by the Colorado Constitution.

Other regulations can be compared from outside Western Colorado. The City of Pueblo conditionally allows marijuana-related land uses except for retail sales. By contrast, Pueblo County has allowed retail sales, growing, and processing in several zone districts, leading to a proliferation of marijuana retail at the edge of the incorporated city limits. The State of Utah allows marijuana for medical purposes only, including medical marijuana dispensaries. Utah does not allow land uses related to recreational marijuana, and enforces a criminal penalty for cultivation, consumption, and sale.

Overall, most major Colorado metropolitan areas have allowed marijuana-related

businesses while many smaller communities have not. As of January 2019, at least 106 Colorado jurisdictions have allowed recreational and/or medical marijuana businesses, 77 of these being municipalities (less than 30% of the total 270 municipalities in the state). Denver, Colorado Springs, Fort Collins, and Boulder are among them. The total number of marijuana businesses in the state has accordingly increased. As of April 1, 2020, there are 685 licensed retail recreational cultivators and 463 licensed retail medical cultivators, as well as 590 licensed retail recreational stores and 435 licensed retail medical stores.

Enforcement – While the Marijuana Enforcement Division (MED) regulates the licensing from the state perspective, a separate license is recommended or in some cases required by ordinance to operate such an establishment within city limits. The Grand Junction Police Department recommends that the perception of increased criminality be addressed and how it could affect our local community. The Department is working with police agencies across the state to study the further understand the issue. Other considerations include whether initial parameters are set regarding allowing cultivation operations or just retail within city limits. Regardless, law enforcement will need to understand opportunities and challenges regarding criminal activity, licensing, and locations of operations.

Some law enforcement agencies across the state specifically earmark revenue from marijuana sales for law enforcement personnel to ensure compliance is maintained within the businesses. This is not the role of the MED, but rather local law enforcement.

Zoning for Marijuana-related Land Uses – Land use and zoning regulations are important to most jurisdictions' approaches to marijuana-related businesses. Statewide, many communities that allow marijuana sales identify retail sales of marijuana as allowed or conditionally allowed uses in a range of commercial and industrial zone districts. Processing facilities are typically allowed or conditionally allowed in commercial and industrial zone districts. Growing operations are typically allowed in these same districts, and sometimes in rural and/or agricultural residential districts. Most marijuana-related land uses not allowed in residential zones, except for personal and medical grows protected by state constitutional law. Moreover, the question of whether marijuana-related uses are considered desirable in a zone district depends heavily on local conditions. Some communities have concentrated marijuana sales in blighted districts to try to revitalize those districts. Other communities have attempted to spread marijuana sales throughout the community or to separate marijuana sales from other uses that may be considered incompatible.

One strategy for limiting the total number of marijuana businesses in the community is to establish a quota or numerical limit, either citywide or pertaining to various neighborhoods or districts. For example, the City of Palisade has established a

maximum of two marijuana sales locations. Entire states have also established quota systems, such as Maine, which is divided into eight districts allowing one medical marijuana dispensary location in each district. Those with quotas usually resort to a lottery system for issuance of a limited number of permits.

A common strategy for controlling location of marijuana-related businesses is to establish “marijuana free districts” or “exclusion zones.” In such a zone or district (typically effected as an overlay zone), no marijuana-related business may operate. This strategy has been used by many communities to keep marijuana businesses out of downtowns; the strategy has been applied to a seven-block area in downtown Palisade. Another common strategy, which is widely used in California and functions inversely to marijuana exclusion zones, are so-called “green zones” where marijuana-related businesses are specifically allowed. These green zones may have different layers for growing, processing, and sales. Usually, communities with green zones do not allow marijuana-related business outside of the green zone.

Marijuana cultivation is typically regulated separately from other agricultural uses, such that Land Use Code definitions associated with agriculture usually must be amended. Grows are typically an industrial activity, rather than an agricultural activity, and are often allowed or conditionally allowed in industrial zone districts. Marijuana cultivation may also pose challenges for various utilities. Heavy and intermittent electrical demand, high water consumption, and potential contamination of water with significant fertilizer runoff have all posed challenges for utilities in various communities. An important consideration in regard to growing of marijuana is whether to allow indoor grows only, or to allow outdoor or mixed-light grows. Allowing outdoor growing operations typically requires substantial screening standards to reduce visual impacts and makes control of odor nuisance much more difficult. Another challenge attendant to outdoor grows is the difficulty of controlling pollen from marijuana plants. Pollen from marijuana plants can fertilize hemp plants, such that THC quantities in the hemp exceed allowed limits and the crop must be destroyed.

Whereas marijuana cultivation is usually regulated very differently than other agriculture, regulations for the processing of marijuana generally align with both the overall zoning standards for industrial uses. In particular, many processing uses require hazardous materials of various kinds. Like marijuana cultivation, processing is generally subjected to extra measures for control of odor nuisance.

Further, as the marijuana industry has evolved, some businesses have specialized while others have sought to vertically integrate. Thus, a community that allows marijuana-related uses can expect to see requests for combined facilities for growing, processing, and sales, or any combination thereof, in addition to requests for businesses specializing in only one of these elements of the industry. Challenges may accordingly arise if zoning for growing, processing, and retail do not adequately

overlap.

Mitigating negative impacts of marijuana related businesses may also present an equity issue. Prior to legalization, a large and well-documented disparity in marijuana-related criminal charges created a disproportionate negative impact on low-income people and people of color. Similarly, a growing body of research indicates that the negative impacts of legal marijuana are also felt by racial minorities and poor neighborhoods. This is the case with many LULUs, or "locally-unwanted land uses," such as liquor stores, homeless services, rehab centers, and prisons. Land use and zoning regulations should be designed to prevent the discriminatory impact of noise, odor, light, traffic, volatile organic compounds (VOCs), air quality, and other nuisance on the City's minority and low-income residents. This knowledge should inform zoning decisions, including decisions regarding the location of "green zones" or "exclusion zones" should the utilization of these zoning tools be considered.

Use-Specific Standards – In addition to general zoning for marijuana businesses, other standards impact location. A Colorado State standard requires that no dispensary be within 1000 feet of a school, though local governments may modify this distance. Some communities establish distance requirements between marijuana businesses and other uses, possibly including hemp grows as alluded to above. Other potential marijuana-related nuisances may be mitigated through use-specific standards. For example, parking requirements per square foot may be higher than for other retail uses, especially in communities with limits on the number of marijuana retail locations. Many municipalities also establish limits on the floor area of a retail location, to prevent the establishment of very large marijuana stores and to limit the potential impacts on real estate market under certain conditions. Other common performance standards include limits on the visual and written references to marijuana on signage; window opacity standards; odor control requirements beyond general municipal standards; and site improvements beyond general municipal requirements.

This item is intended for discussion and possible direction by Council. As a part of the discussion, a representative from the Marijuana Enforcement Division (MED) will present on the topic.

FISCAL IMPACT:

A fiscal impact could be prepared based on direction from City Council.

SUGGESTED ACTION:

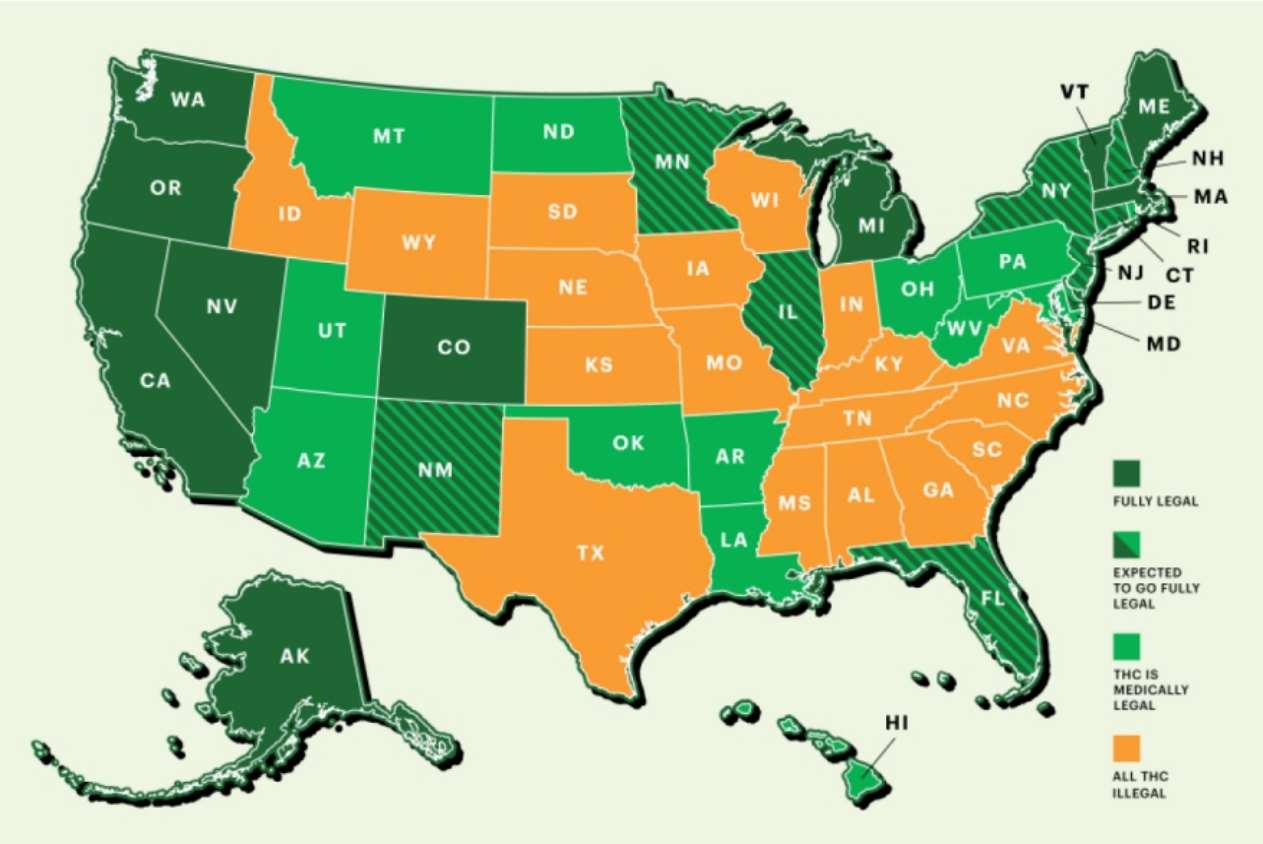
Understanding Colorado Regulated Marijuana

July 2020

Status of marijuana legalization across the country



Source: https://www.rollingstone.com/culture/culture-features/cannabis-legalization-states-map-831885/

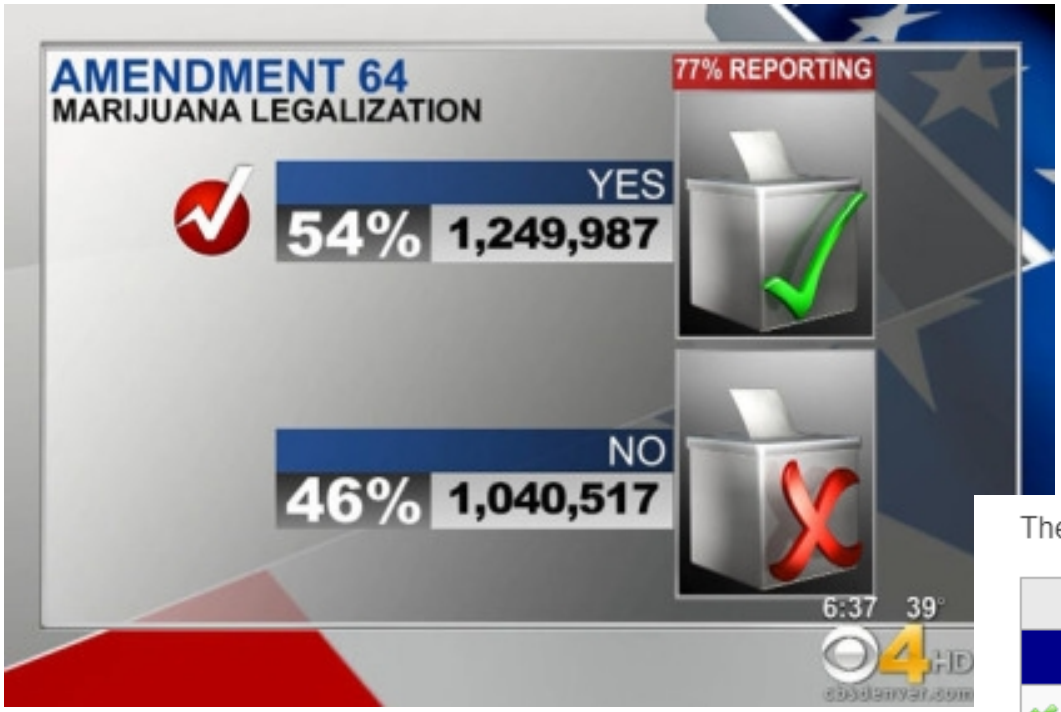
A very, very brief history lesson.

2000 2010

2012 2014

When in comes to adult-use,
Colorado was first!

Colorado Voters spoke in 2012



The following are **official** election results:

Colorado Amendment 64		
Result	Votes	Percentage
✔ **Yes**	**1,383,139**	**55.32%**
No	1,116,894	44.68%

Results via Colorado Secretary of State.

Source: https://denver.cbslocal.com/2012/11/06/no-on-64-concedes-colorado-votes-in-favor-of-pot-legalization/

Why is it so complicated?

- Illegal substance under Federal law
  - Cole memo priorities remain relevant
- Limited federal oversight
  - FDA, EPA, NHTSA, etc.
- Innovative, dynamic industry
- Lack of historical science and research
  - Federal role diminished
- Dual licenses required, both state and local
- Industrial hemp cultivations are regulated by the Colorado Department of Agriculture.
- CBD derived from industrial hemp used in food and beverage products are regulated by the Colorado Department of Public Health and Environment

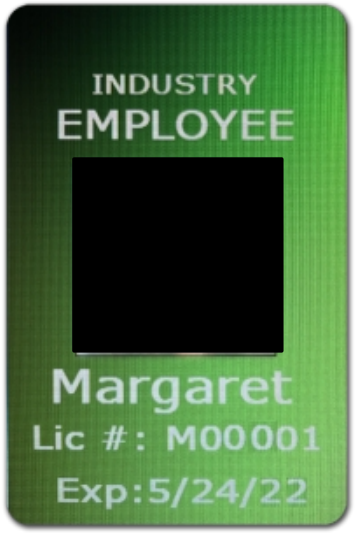
Licensing Basics

1. MED issues licenses for both legal regulated marijuana businesses and marijuana employees.
2. Business applications include:
    1. A completed Regulated Marijuana Business License Application
    2. All applicable Findings of Suitability (Natural Person or Owner Entity) Applications
    3. Supporting documentation
    4. Payment
3. Owner and employee applications must include:
    1. A completed MED Employee License Application
    2. Identification
    3. Fingerprints for criminal background check
    4. Payment
4. Businesses must renew their licenses every year. Owners renew every year. Employees renew every two years.

People

Occupational License Type	Number of Licenses (as of June 1, 2020)
Owners	1,858
Employees	39,286
TOTAL:	**41,144**



Colorado.Gov/Revenue

Places

Local Jurisdictions

- According to the Colorado Municipal League, there are 272 cities and towns in Colorado and 64 counties. Of these 336 local jurisdictions, 108 have opted in to legalize either medical marijuana, retail marijuana or both.
- While this is fewer than 1/3 of all jurisdictions, the most populated areas of Colorado have generally opted-in:
  - Denver, Aurora, Boulder, Colorado Springs as some examples
- For a list of all jurisdictions that have allowed commercial, regulated marijuana businesses, please see this list:
  - https://drive.google.com/file/d/1GcdE3drg3xf74ix48ZsSME2s0rEw2-go/view

Number of Licenses

As of June 1, 2020, there are **2,755** licenses approved across the state.

License/Permit Types	Medical Licenses	Retail Licenses
Stores	438	592
Cultivations	468	699
Infused Product Manufacturers	218	284

Packaging and Labeling Requirements

- Child-resistant packaging is critical
- Putting only the most critical pieces of information on a label to prevent "white noise" effect. For example
  - Warning statements
  - Potency statement
  - Harvest/production batch numbers
  - Universal Symbol

Additional Public Safety Priorities

- Advertising
- Enforcement / underage compliance checks
- Edibles legislation
- Production management/limits
- Waste removal
- Restrictions on purchase amounts (looping)
- Restrictions on hours of operation
- Consumption prohibited on any licensed premises
- 24 hour video surveillance requirements

Tracked, Taxed and TESTED

Marijuana testing: including plants and products:

- Potency
- Homogeneity
- Pesticides
- Contaminants
  - Residual Solvents
  - Microbial

Of note:

- All marijuana testing labs must be ISO-accredited as of 1/1/19.
- Labs may elect to go through process validation
- MED aligns with Federal guidelines whenever possible

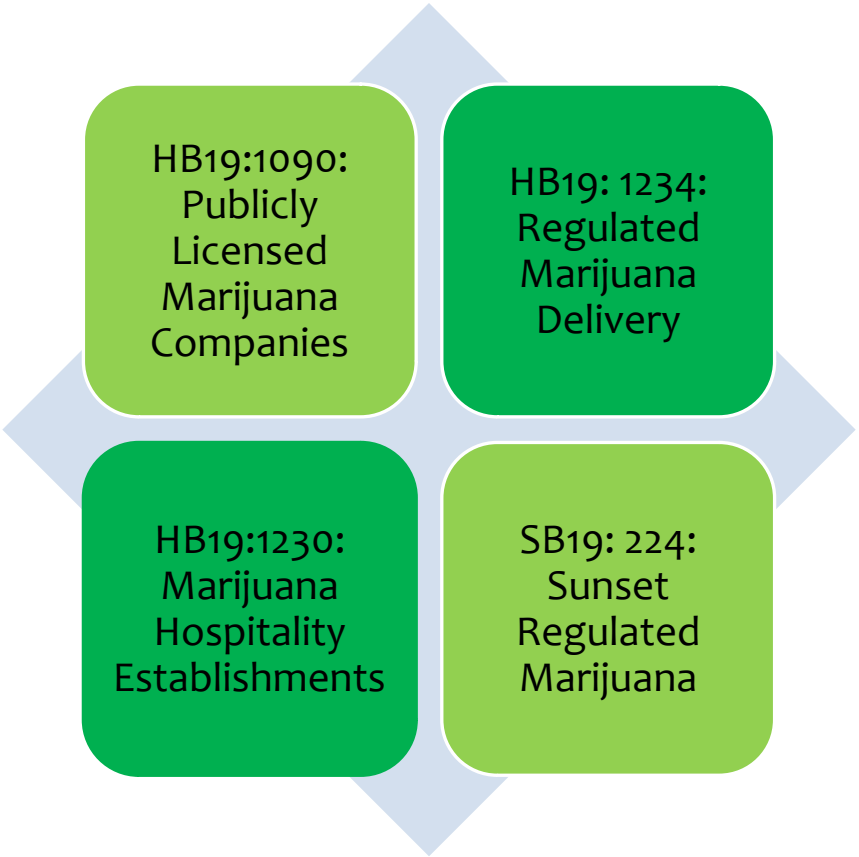
Violations

1. **License Violations Affecting Public Safety – Most Severe**
   - E.g. Unauthorized sale; permitting diversion; possessing marijuana from an unauthorized source; misstatements and omissions in METRC
   - Penalties: Suspension; Fine – up to $100,000; Revocation; Restriction
2. **License Violations**
   - E.g. Failure to keep or maintain business records; minor clerical errors in METRC; packaging and labeling violations that do not have an immediate impact on public safety
   - Penalties: Verbal or Written Warning; Suspension; Fine – up to $50,000; Restriction
3. **License Infractions**
   - E.g. Failure to display badge; unauthorized modifications of the premises of a minor nature
   - Penalties: Verbal or Written Warning; Suspension; Fine – up to $10,000; Restriction

Aggravating and Mitigating Factors

1. History of Violations
2. Good Faith Measures to Prevent
   - Supervision
   - Training
   - Standard Operating Procedures
   - Responsible Vendor Training Designation
3. Past Compliance Checks
4. Corrective Actions
5. Willfulness and Deliberateness
6. Circumstances Surrounding the Violation
   - Self-Reported
7. Owner or Manager Involvement

Landmark 2019 Legislation



COVID-19's effect on marijuana businesses

- Regulated marijuana businesses were designated as critical by Governor Polis, and were able to stay open (with caveats) during the Stay at Home order.
- Key COVID-19 Executive Orders and Emergency Rules* (including, but not limited to):
  - Online sales for retail marijuana
  - Allowance for "curbside" pick-up
  - Allowance for modification of premises to accommodate social distancing best practices without prior approval
  - Allowance of consumers and employees to wear masks
  - Automatic 30 day extension for certain business licenses

*COVID-19 Emergency Rules and Industry Bulletin.
